

Brood macOS SIG

The Brood X macOS Special Interest Group is meeting continuously from 8 a.m. to 3 a.m. every day from May 20 to June 30, 2021. We expect attendance in the tens of billions, making this our most successful session since 2004!

When the Brood X SIG first formed in 1987, Mac IIs were all the fashion, and this year we've moved up to the iMac M1. Our goal this session is to complete a full audio-video presentation (iMovie, Photos, Apple Music, and GarageBand) documenting the SIG activities. And, of course, we have continuous karaoke.

After June 30, 2021, the SIG will go into hiatus until May 20, 2038. The 2038 SIG topic will be: recovering from the UNIX time overflow on September 30, 2034, and making plans for the the Brood X emergence of 2055. As always, male members of the SIG will participate in karaoke.
