Topics

- ✦ Introduction
- ✦ Why is Social Media important to us?
- ✦ What are Social Networks?
- ✦ The Theory of Social Networks
- ✦ The Joy of Social Networking – Demonstrations
- ✦ Concluding Remarks

Our Real-World Social Networks

- ✦ Family and extended family;
- ✦ Friends
- ✦ Religious Affiliations and places of worship;
- ✦ Colleagues at work;
- ✦ Clubs we belong to: Washington Apple Pi
- ✦ Professional Societies
- ✦ We interact with our friends by email, letters, home visits, church socials, conferences, picnics, etc.

Our Online Social Networks

- ✦ Online Social Networks allow us to create digital versions of our real-world connections;
- ✦ Allow us to share our social media (messages, posts, photos, movies) with our friends online;
- ✦ We can monitor the pulse of what's happening to our friends, family, colleagues and even the world;
- ✦ Social Media allow us to tap into the world's collective insights.

Online Social Networks

- ✦ You can control who you interact with, what you share, and what you read via Social Media;
- ✦ Privacy is a very important aspect of Social Media;
- ✦ So what social media sites and networks are there?
- ✦ Which ones do you belong to and how do you use them?

Theory of Social Networks

- ✦ A **social network** can be represented as a graph consisting of nodes and edges in which the nodes can represent people and the edges can represent 'friendships' among those people;
- ✦ There are three important concepts that help us to understand why online social networks are successful:
 - ✦ Triadic Closure
 - ✦ Homophily
 - ✦ Degrees of Separation

Triadic Closure

- ✦ If A is a friend of B and B is a friend of C, then it makes sense that A might want to be a friend of C
- ✦ If Larry is a friend of Lawrence and Lawrence is a friend of Bob, then it is highly likely that Larry will become a friend of Bob.
- ✦ The idea is to make it easy to form friendships
 - ✦ Facebook has "Find Friends" Browser
 - ✦ Google+ has "Circles"
 - ✦ LinkedIn has "Add to my professional network"

Homophily

- ✦ Homophily indicates that we will make friends with those sharing similar interests:
 - ✦ Washington Apple Pi;
 - ✦ Locale where we live;
 - ✦ Associations we belong to;
 - ✦ HomeTown;
 - ✦ High School Attended;
 - ✦ University Attended;
 - ✦ Hobbies;
 - ✦ Special Interest Groups.

Degrees of Separation - Small World Assumption

- ✦ The notion is that we are, on average, six degrees of separation away from any member in the social network; this was the pioneering work of Milgram in 1967.
- ✦ Kevin Bacon Game
 - ✦ The **Bacon Number** is the fewest number of steps for an actor in Hollywood to connect with Kevin Bacon;
 - ✦ Every actor in Hollywood is 6-degrees from Kevin Bacon;
 - ✦ An actor has co-starred with Kevin Bacon, or has co-starred with someone who co-starred with Kevin Bacon, or has co-starred with someone, ... (six-times) with Kevin Bacon;

Kevin Bacon and the Fonz

Degrees of Separation - Small World Assumption

- ✦ On Facebook everyone is connected, on average, by 4-degrees of separation; WOW, that is hard to believe!
- ✦ On LinkedIn, Larry can reach over 4 million people with my connections (3-degrees of separation).
- ✦ On LinkedIn, Larry is 3-degrees from Mark Zuckerberg!
- ✦ On Twitter, my tweet can reach 100 million users.

Larry's Network on LinkedIn

Your Network of Trusted Professionals

You are at the center of your network. Your connections can introduce you to 4,380,900+ professionals — here's how your network breaks down:

1  Your Connections Your trusted friends and colleagues	281
2  Two degrees away Friends of friends; each connected to one of your connections	60,500+
3  Three degrees away Reach these users through a friend and one of their friends	4,320,000+
Total users you can contact through an Introduction	4,380,900+

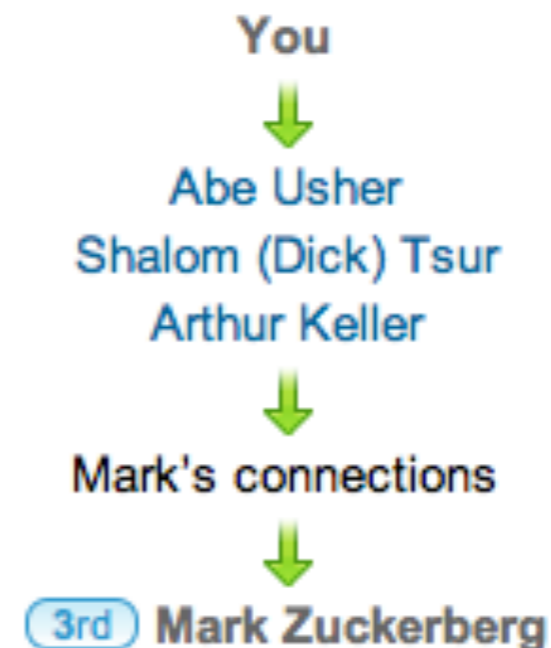

19,441 new people in your network since May 19

The LinkedIn Network

The total of all LinkedIn users, who can be contacted directly through InMail

In a Relationship ...

As of April 2012, Facebook has:

901 million
monthly active users

3.2 billion
Likes & Comments per day

300 million
photos uploaded per day

125 billion
friendships

The Joy of Social Networking – Demonstrations

- ✦ Larry

- ✦ Making Friends on Facebook, Google+, and LinkedIn;
- ✦ Facebook Open Graph and Social Apps;

- ✦ Ken

- ✦ Facebook Timeline, uploading photos to Facebook and Google+;

- ✦ Lawrence

- ✦ Privacy settings for Facebook and Google+;

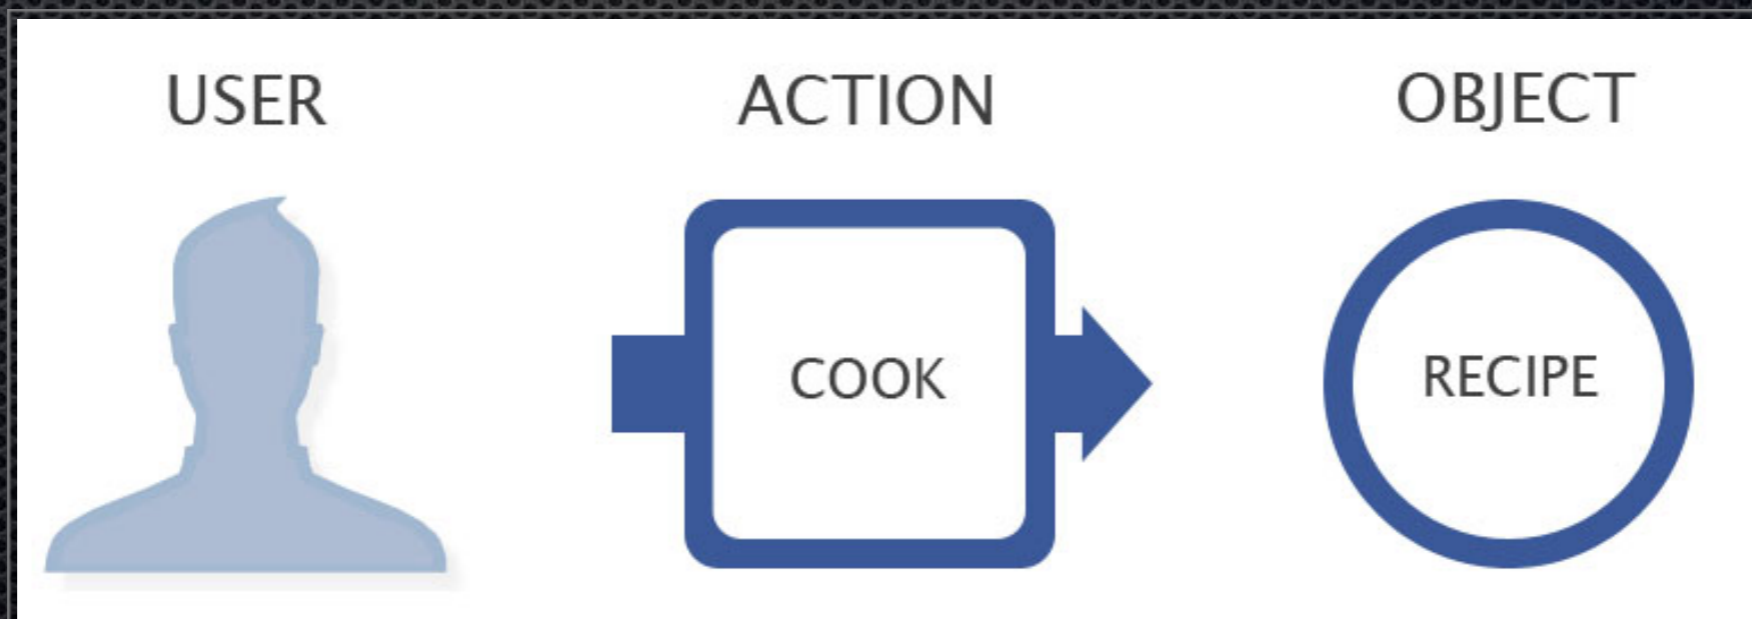

- ✦ Travis

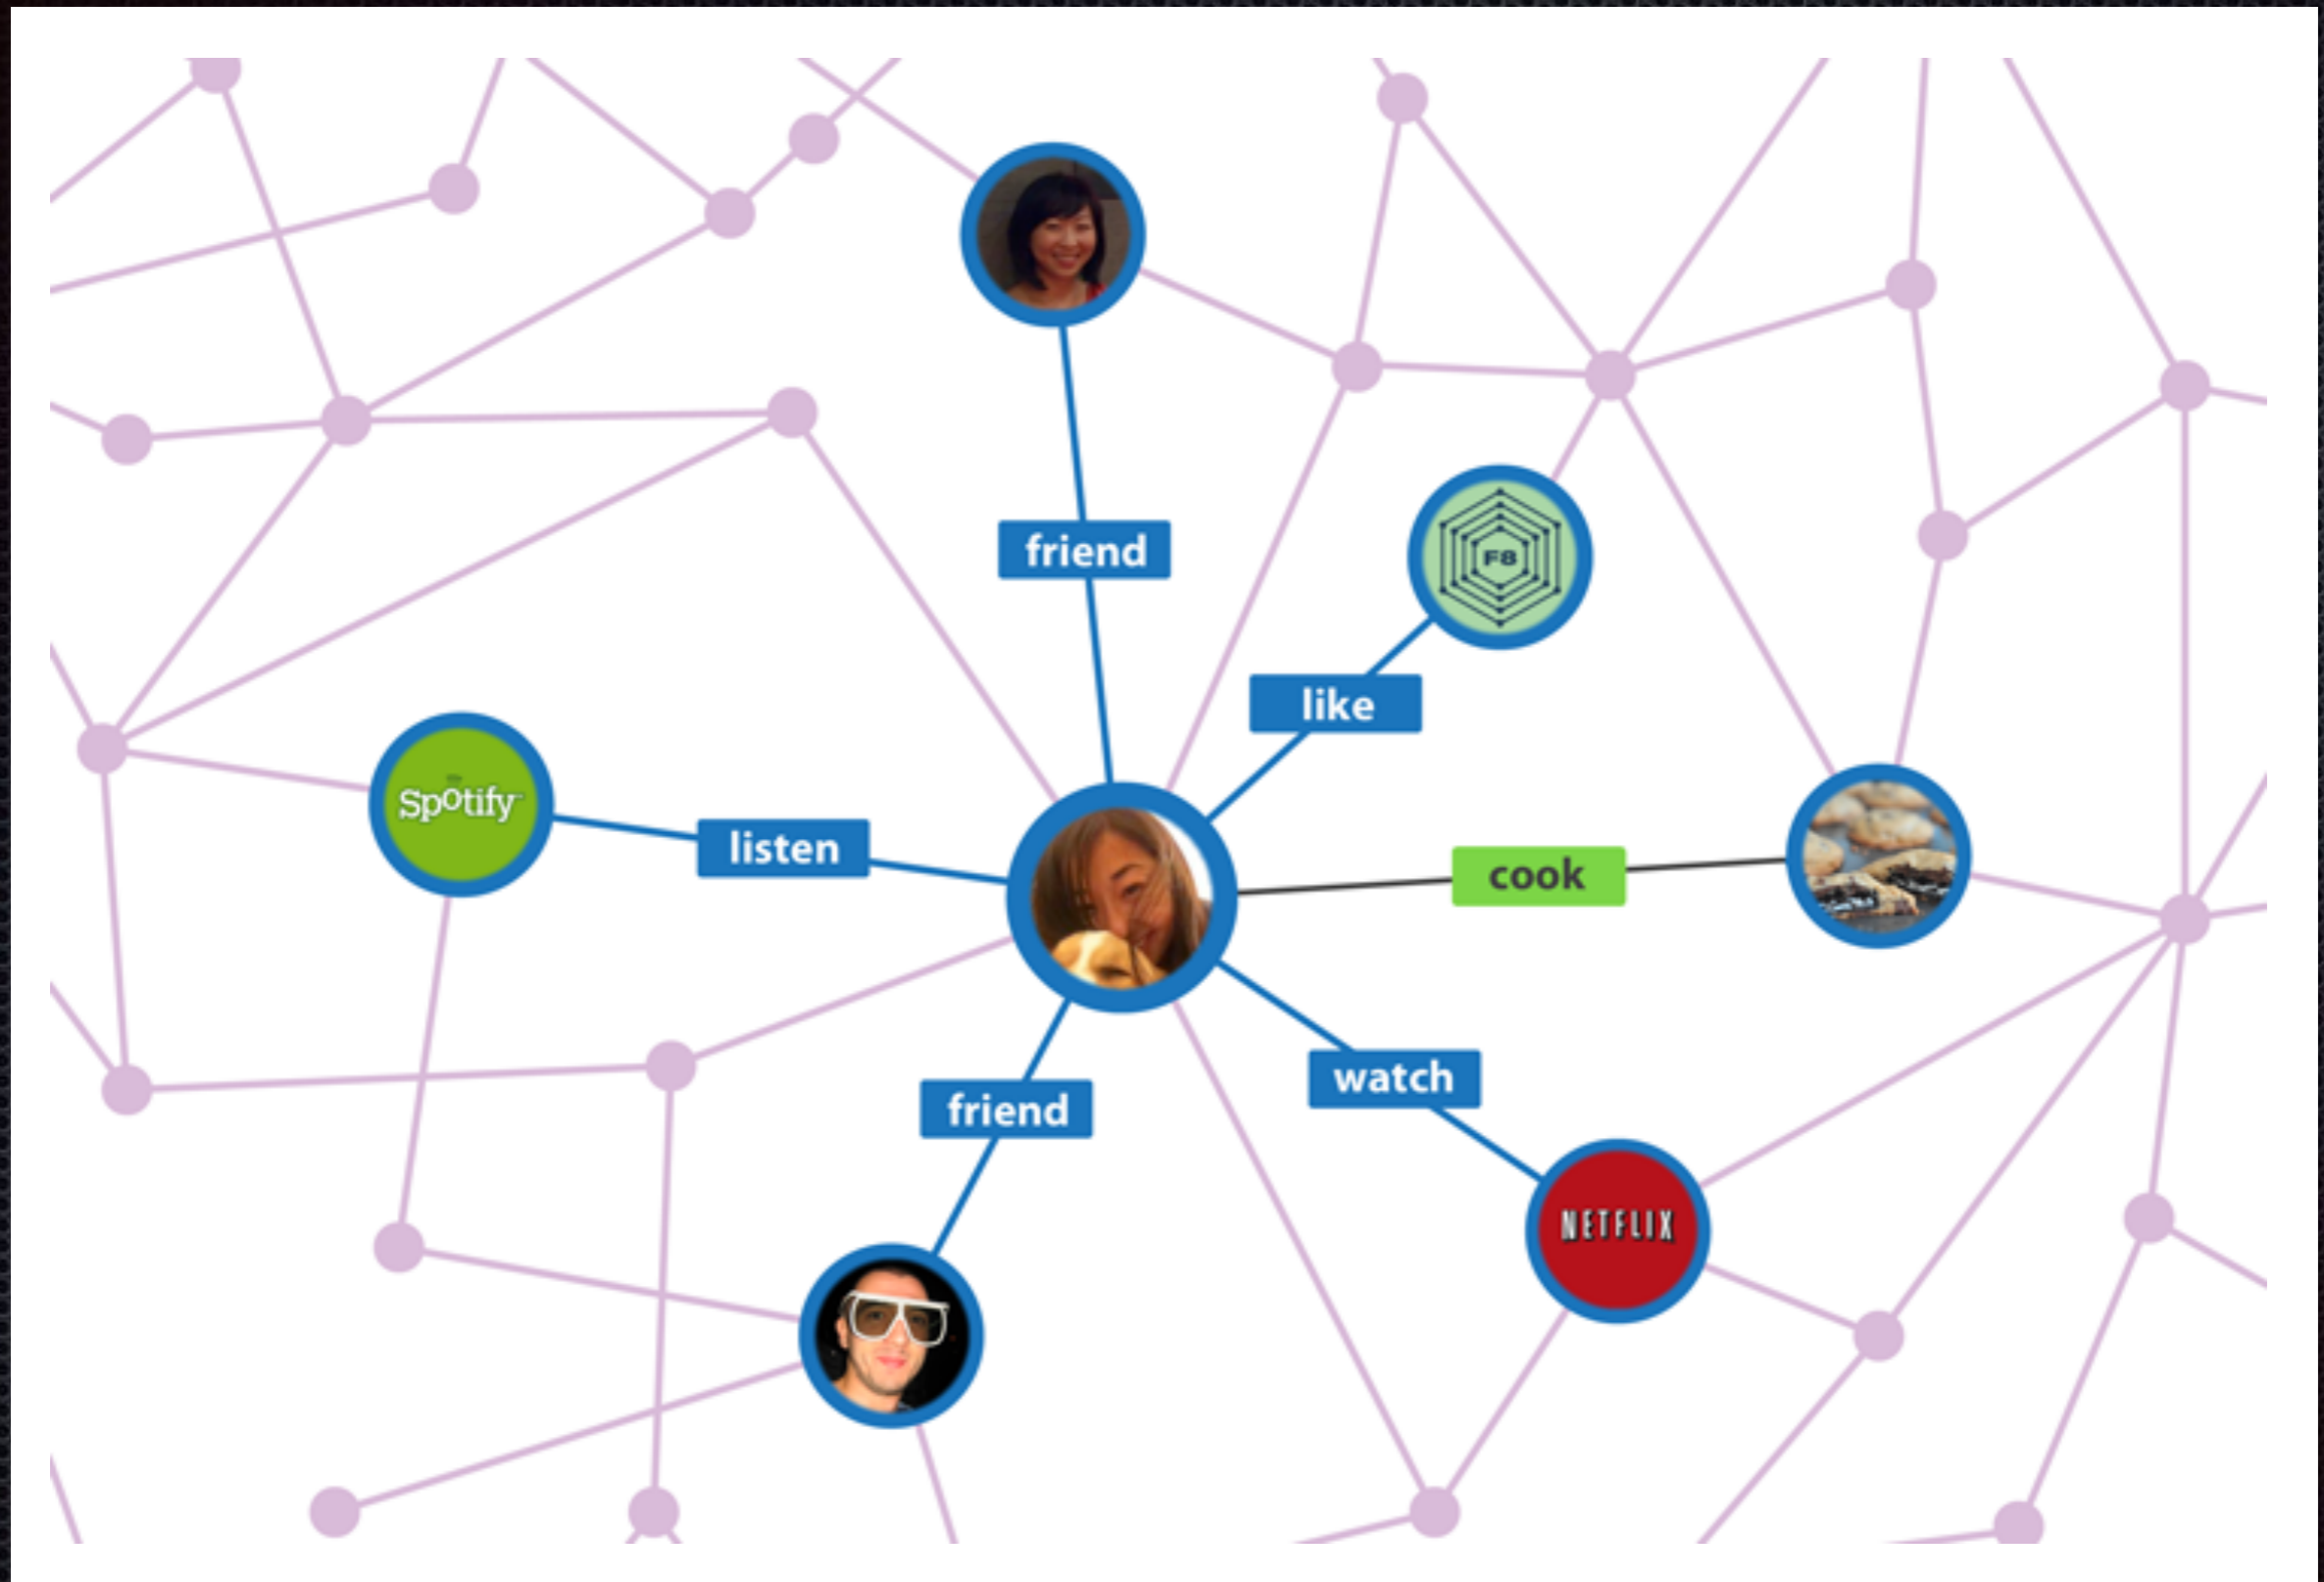

- ✦ Posting to Facebook, Google+ and Twitter

Facebook Open Graph and Social Apps

Open Graph

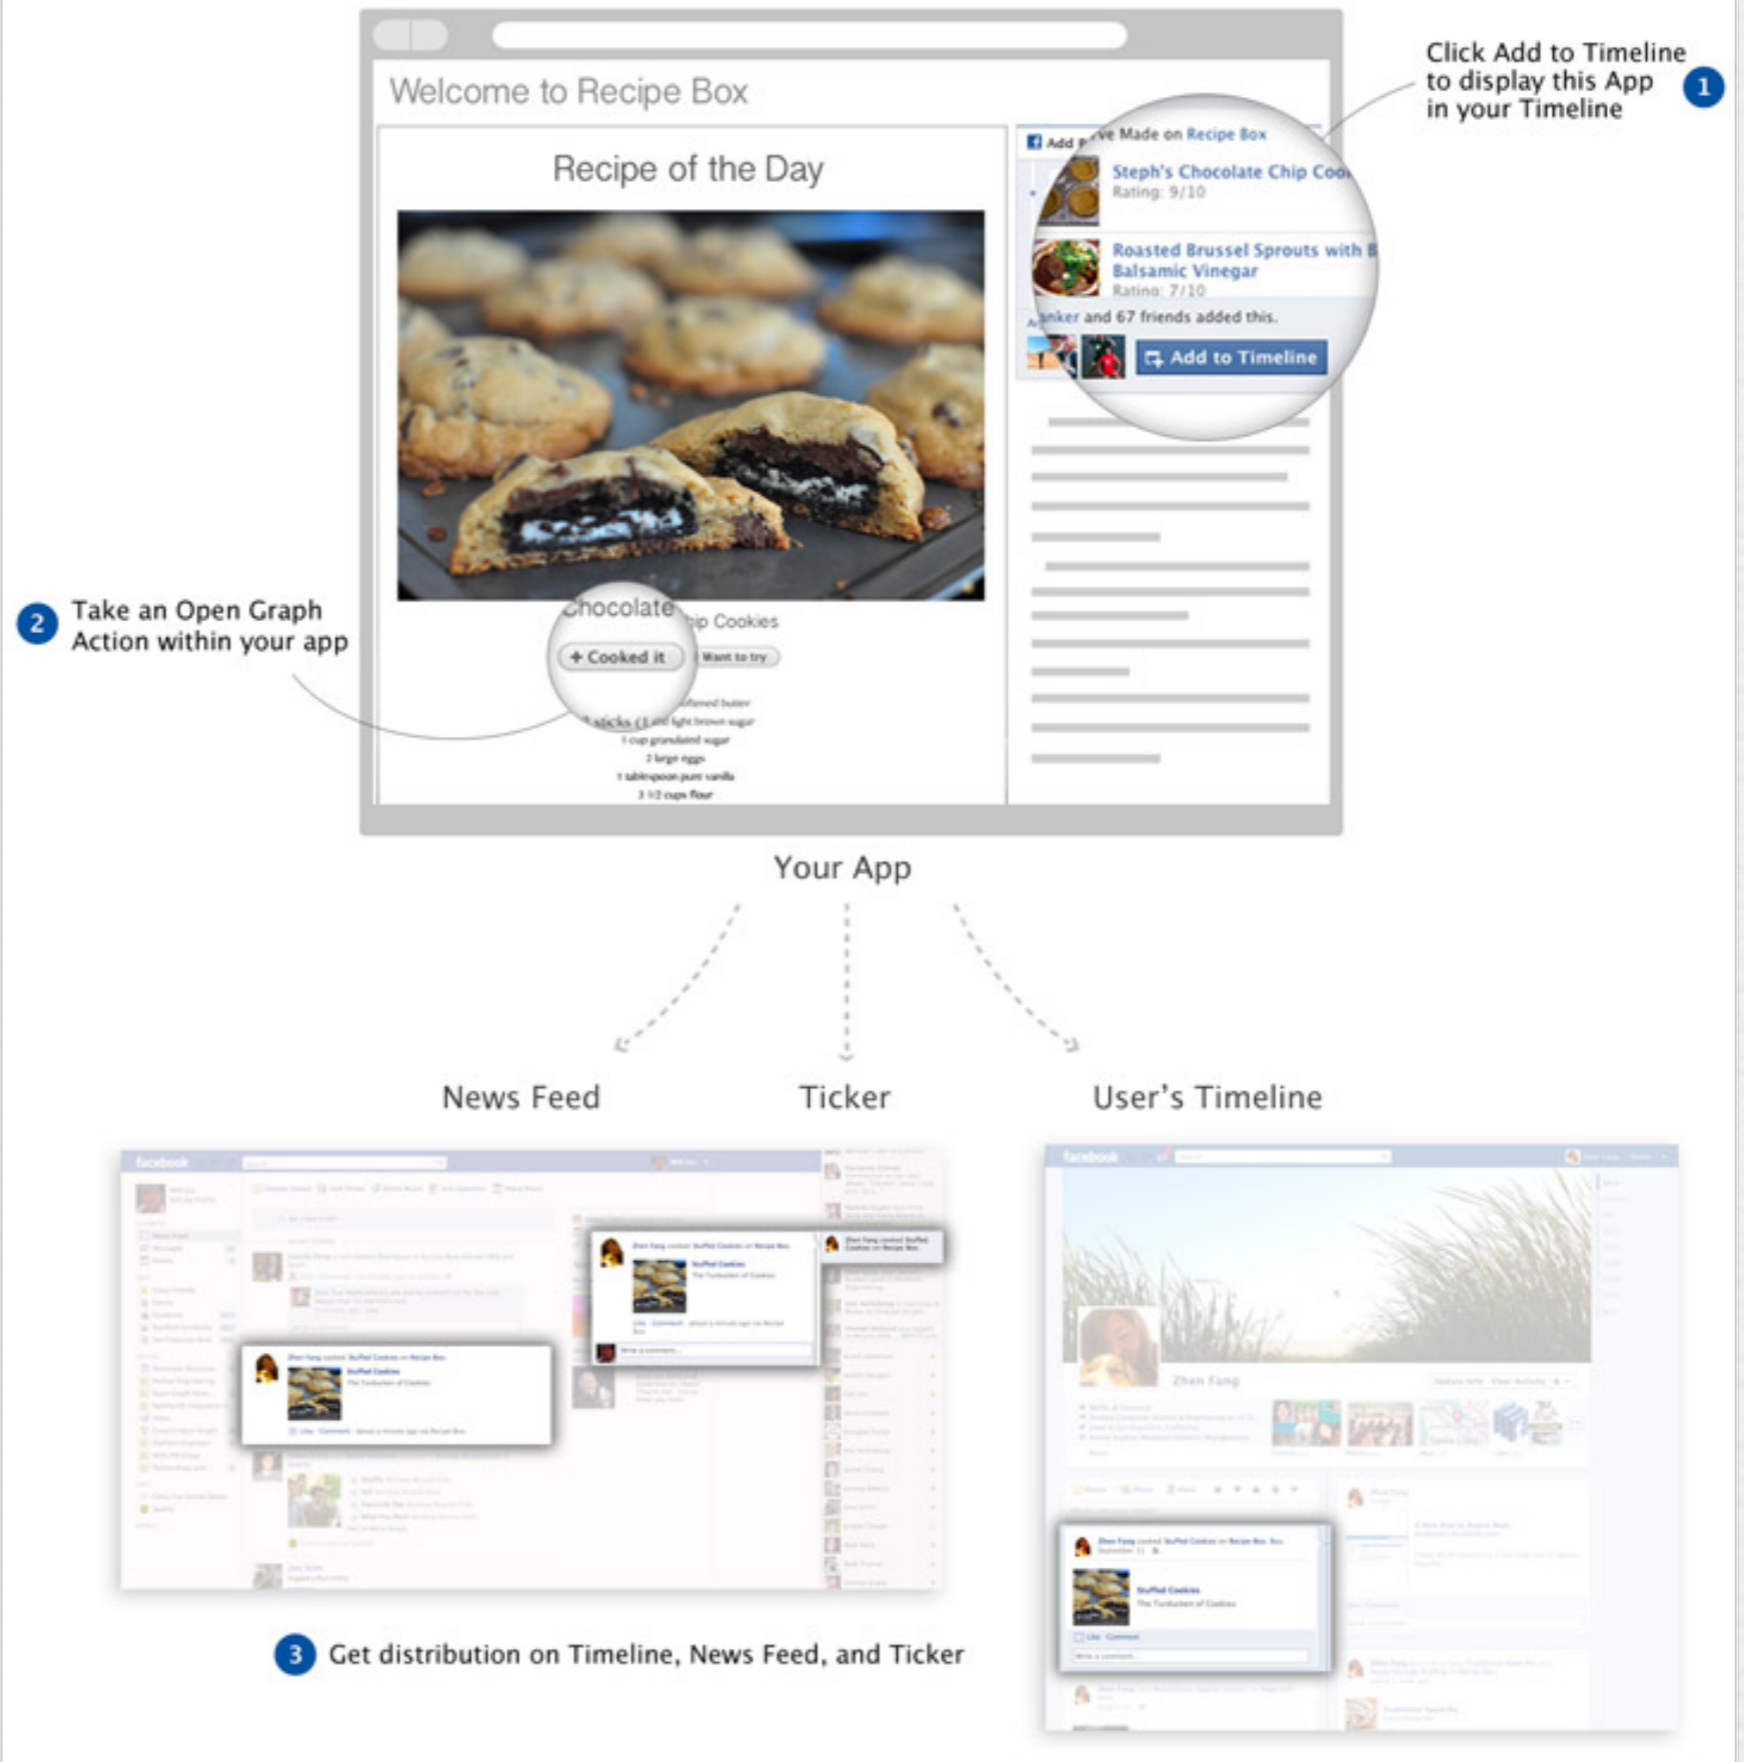

- ✦ Facebook has adopted the Open Graph Protocol to capture the objects, properties and relationships *among important objects in Facebook*,
- ✦ What kinds of objects do we find in Facebook?
- ✦ How are they represented in the OGP?

Example of a User's Open Graph

Open Graph Distribution of Your “Social Activities”

Social Apps Demo

- ✦ Social Graph
- ✦ Washington Post
- ✦ Netflix
- ✦ Social Cam
- ✦ Other apps recommended by the audience.

Conclusions

- ✦ Social Media and Social Networks allows us to connect to our friends and maintain our online social contacts;
- ✦ The Facebook Timeline encourages you to share your life events with your friends and the world;
- ✦ We have control over what we share, what we read and who we 'socialize' with;
- ✦ There is evidence that Facebook users have come to view their 'Profile' as a tangible object that is their property that they continue to improve upon.
- ✦ There is also evidence that even though people use social networks, they are becoming increasingly lonely (The Atlantic Monthly);
- ✦ Social Networks are here to stay and can improve our lives by enhancing our existing networks and creating new ones.
