## BACKGROUND

The Washington Apple Pi membership data base is currently maintained using the commercial program "General Manager" by Sierra On-Line Inc., implemented on a 6 megabyte removable cartridge disk system. Thanks to Paul Malachowski of Brillig Systems, Inc., one of the authors of "General Manager", we have implemented a multi-keyed storage scheme whereby the data base may be scanned in alphabetical order or in zipcode order at any time. In addition, the Applesoft interface to "General Manager" allows us to produce specialized output summaries and/or formatting options, such as our membership cards, which the standard reporting options could not produce.

This Directory was produced by the "Text File Output" option of "General Manager" Reporting. The resulting text files were then formatted and paged using the "ScreenWriter" word processor, and subsequently printed in camera-ready form on an Anderson-Jacobson 833 letter quality daisywheel printer.

Your comments about the Directory would be useful in planning for future issues.

I would like to thank Genevie and Bernie Urban for the final editing, printing and layout of this Directory.

Dana J. Schwartz  
Membership Chairman

## VITAL STATISTICS

The October 1984 Membership Directory is current as of September 24, 1984. It contains the names of 3756 of the 4099 members of Washington Apple Pi on that date (approximately 92 percent of the membership). The last member number assigned prior to the cutoff date was 5534.

The directory is presented in two sorted forms: alphabetically and by zipcode. The information listed is from the member's WAP mailing address, and the telephone number is the last home phone number supplied to the club. In a very few cases, the work phone was used where no home number was available.

Errors or changes should be reported to the office.

This directory is for use only by members of Washington Apple Pi. Its use for any commercial purpose is strictly prohibited. This directory may not be reproduced in whole or in part without the express consent of Washington Apple Pi.

# A Call for Articles.

*The WAF Journal needs articles in all areas from novice to expert, covering Apple II, IIc, III, MAC, Fat MAC and the LISA. The article which you contribute may reward you tenfold in the number and types of articles which are submitted in kind by others.*

*As you write, so shall you read!*

*Get into the "Journal Habit".*
